About the AMA Physician Professional Data™, formerly known as AMA Physician Masterfile:
Established by the American Medical Association (AMA) in 1906, the AMA Physician Professional Data™ was initially developed as a record keeping device supporting membership and mailing activities and protecting against fraud. The AMA Physician Professional Data includes education, training, and professional certification information in addition to demographic and practice data on all Doctors of Medicine (MD) and the majority of Doctors of Osteopathic Medicine (DO) in the United States and territories. The AMA has made the Physician Professional Data available through database licensees for more than 60 years.
